The bottom section of the page features a light grey background with a faint, low-angle photograph of a modern skyscraper. Large green geometric shapes are positioned in the bottom left and bottom right corners, mirroring the design elements at the top of the page.

Vision & Mission Statements

Biotic Organic Solutions is dedicated to eliminating the use of toxic and harmful chemicals from cleaning and sanitation processes. The company envisions a greener, safer, and healthier world for present and future generations by improving hygiene standards across diverse sectors.

Its mission is to develop cost-effective, high-performance, and sustainable technologies for cleaning, sanitization, and wastewater treatment. By offering eco-friendly, value-added solutions, Biotic Organic Solutions aims to drive long-term environmental impact and well-being.

Industrial Products & Services

Natural SS Polish & SSR (Rust Remover)

Streak-free, biodegradable metal surface cleaners

Nzyme-Odour Control (OC)

Enzyme-based odor control solution for waste & water (ETP/STP, Plants, etc.)

Natural Grease trap cleaner

Powerful solution for removing clogging caused by grease, oils, etc.

Nzyme- Water Treatment (WT)

Solution for TDS, COD, BOD reduction and further filtration at water treatment plants

OXYBON-C

Organic food grade odourless solution used for cleaning (machinery, ROs, etc.) by food industries

NZYME- WL Waterless Urinal Solution

Water-free urinal converter conserving 100% flushing water

N1-Degreaser & N2-De-Scaler

Heavy-duty oil/grease remover and descaler

Lake Cleaning & Rejuvenation, Aquaculture Enhancement, Establishing ecosystem for Odour Control & Disinfectants

Housekeeping Products

Natural-C Conc. (B1)

Floor cleaner & sanitizer
effective against bacteria,
viruses & molds

Natural Laundry Detergent

Non-chlorinated
dishwashing detergent and
rinse aid

Natural Multipurpose Cleaner(B2 & B7)

Multi-enzyme probiotic
cleaner for general use

Natural Toilet Bowl Cleaner (B6)

Decalcifying and
deodorizing cleaner

Natural Glass Cleaner Conc. (B3)

Streak-free, biodegradable
glass cleaner

Natural Bathroom Cleaner (B9)

Dissolves soap scum and
bathroom stains

Natural Dish Wash

Gentle yet powerful plant-
based dishwashing solution

Natural Soft Care & Soft Care Plus

Soap-free liquid and foam-
based hand washes

Aquaculture Products

EMO-301 S&W Probiotics

Neutralizes nitrogenous waste, sulphates, phosphorus, ammonia & others

EMO-302 GUT Probiotics

Boosts shrimp's gut health, improves digestibility & fights HPS

EMO-303 GUT Control

Inhibits hepato pancreas and enhances immune systems

EMO-304 Ammonia Reducer

Reduces nitrogenous wastes like ammonia & nitrates strongly

EMO-305 Paratreat

Kills free spores outside the cell, repairs and fights damages from EHP

EMO-306 Water Sanitizer

Protects from secondary infections caused by external wounds

EMO-307 Sludge Treatment

Degrades & breakdowns a wide range of organic pollutants in water like COD, BOD, etc.

Other Products & Industries

FOOD PROCESSING

We keep food processing plants safe, secure and sanitized. More importantly our organic products leave no residue, hence keeping processed food chemical free!

We maintain and clean all types of processing equipments including and low foam cleaners and degreasers with organic enzymatic probiotic products. Our disinfectants are effective against a wide variety of germs and pathogens.

- CIP/COP
- General Cleaning & Degreasing
- Process Water
- Plant and Machinery
- Resin and Filter
- Storage Tank
- Air Conditioning Systems
- Ducts/towers cooling
- Insects and Bug control

LIVE STOCK

- Cleaning of surfaces
- De-greasing
- Odour control
- Waste treatment
- Water pipe line cleaning
- Biofilm removal

We offer a range of bio enzyme and innovatively advanced formulas designed to handle the demands of animal waste management and farmyard sanitization, maximizing efficiency and promoting higher profitability.

WASTE WATER TREATMENT

NZYME-WT a brown liquid is a concentrated source of hydrolytic enzymes and multi strains of natural bacteria that are genetically capable of producing concentrations of enzymes in waste treatment systems under aerobic and anaerobic conditions.

- Reducing **COD/ BOD** in STP plant
- Reducing **COD /BOD** in ETP plant
- Odour Control
- Process Water Disinfection
- Improve Water Quality
- Reuse Water for various purposes
- **TDS** reduction in ETP plants
- Water filtration for textile industries
- Sludge Treatment for shoe industries

Target Market & Industries served

INDUSTRIES SERVED

- Hospitality
- Facilities Management
- Healthcare, Institutions
- Corporates
- Municipalities
- Educational Institutes
- Dairy Industries
- Manufacturing Industries
- Food Processing
- Hotels & Industries
- Fisheries & Shrimp Farms
- Agriculture
- Pharma & Cosmetics
- Oil Production Facilities
- Sewage & Drains
- Railways & Airlines

GEOGRAPHICAL REACH

INDIA NEPAL DUBAI VIETNAM SAUDI ARABIA AUSTRALIA

Achievements & Milestones

2019: Started as a Limited Liability Partnership Firm focusing only on organic housekeeping product range for the B2B segment.

2020: Incorporated as a Private Limited Company with a vision to replace toxic chemicals with sustainable, bio-based cleaning, wastewater treatment solutions and other industries.

2021: Set up an in-house manufacturing unit, research lab, and R&D center in Noida, focused entirely on organic, bacteria- and enzyme-based products.

2022: Collaborated with Suez to fight challenges faced by Dubai Municipality in terms of odor control in 50 TPD waste management plants using proprietary enzyme-based formulations.

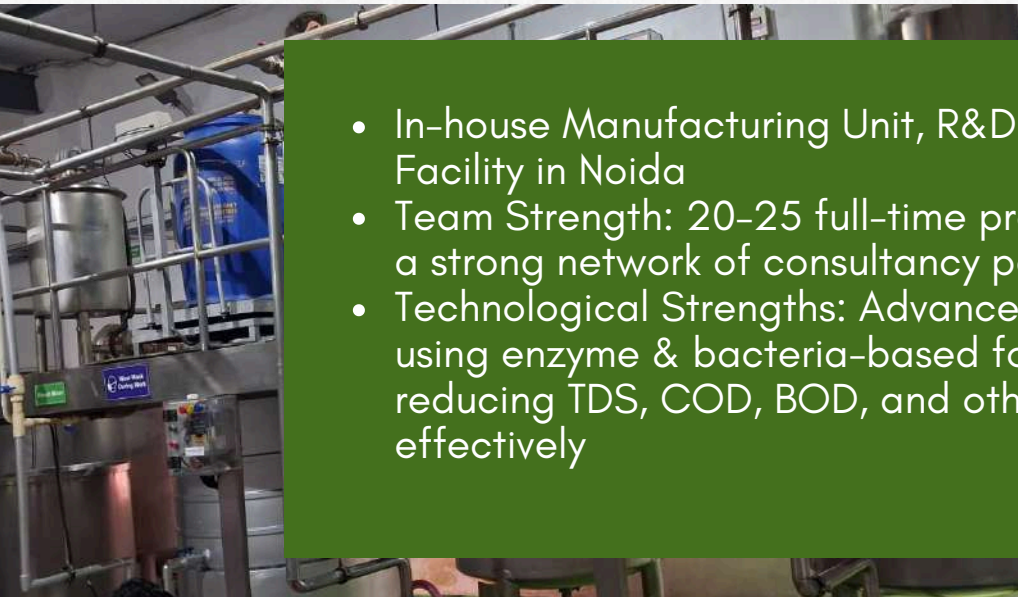

2023: Led lake rejuvenation and cleaning projects across bodies of water spanning up to 7 acres, helping eliminate mosquito breeding and waterborne diseases

2024: Expanded into international markets including Vietnam and the UAE, supporting aquaculture health and waste odor control at scale.

2025: Partnered with reputed institutions like Lovely Professional University, Symbiosis International University, and Unilever Haridwar for large-scale adoption of eco-cleaning and water-saving solutions.

Infrastructure & Capabilities

- In-house Manufacturing Unit, R&D Lab, and Testing Facility in Noida
- Team Strength: 20-25 full-time professionals along with a strong network of consultancy partners and agencies
- Technological Strengths: Advanced bio-technologies using enzyme & bacteria-based formulations capable of reducing TDS, COD, BOD, and other pollutants effectively

Sustainability Initiatives

Biotic Organic Solutions leads by example by using its own organic housekeeping products such as waterless urinals and plant-based cleaning agents in operations. The company is committed to green practices and contributes to improving public health and the environment through its product offerings.

Quality Assurance & Certificates

- **Bureau Veritas**
- **ISO-GMP**
(ISO- Good Manufacturing Practice, EMS, QMS)
- **CE**
(European Conformity Certificate)
- **ISO**
(International Organization for Standardization)
- **EHS**
(Environment Health and Safety)
- **HACCP**
(Hazard Analysis Critical Control Point)
- **QPCS Organic Certification**
(Quality Perfect Certification Services)
- **Factual Assessments - Global Certifications**

Case Studies & Success Stories

House Keeping

Transitioned top hotel chains to organic cleaning, reducing chemical dependency and water usage

STP/ETP Plants

Enhanced sewage plant efficiency by up to 50%

Waterless Urinals

Saved over 10 lakh liters of water annually through Nzyme-WL installations

Odour Control

Improved working conditions in 10 TPD capacity waste management plants through effective odor control

Industrial Waste & Grease Reduction

Treated complex chemical discharges in footwear industries, reduced grease in pump stations, automobile & other heavy industries.

Aquaculture

Boosted shrimp immunity and disease resistance in Vietnam

Water Bodies

Cleaned mosquito-breeding ponds and lakes, improving public health with ITC.

Key Clients & Partnerships

Let's Work Together

At Biotic Organic Solutions, we believe meaningful impact is built through collaboration. Whether you're a corporation aiming to green your operations, a municipality seeking sustainable solutions, or an institution striving to reduce your environmental footprint, we're here to support your journey. Our expertise in enzyme- and bacteria-based cleaning, wastewater treatment, and odor control enables us to create customized, eco-friendly solutions that align with your goals. Join us in building cleaner, safer, and healthier environments—because real change happens when we work together.
